

Parents: if your child has asthma and there is a **chance** they may need medication such as an inhaler at school. Please consult with their doctor and the doctor completes the PS109 Medication form, which is located on the SRMS website.

Bring the completed PS109 form and inhaler in the original box to school.

Thank you

Your Child and Asthma

Asthma is a disease that affects your lungs. It causes repeated episodes of wheezing, breathlessness, chest tightness, and nighttime or early morning coughing. Asthma can be controlled by taking medicine and avoiding the triggers that can cause an attack. Removing the triggers in your environment can also help to control your asthma.
